

Intelligent forms software: Smart Forms for Smart People!

Spreadsheet Converter

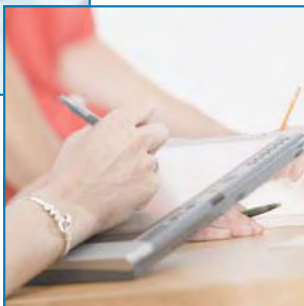

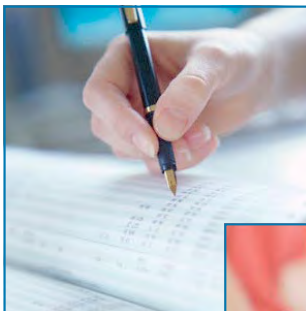

The first software on the market that transforms Excel files automatically to smart form.

Now you can automatically create handwriting recognition enabled Smart Forms for your Tablet PC or Digital Pen or PAD from an existing Excel document. Instantly convert your Excel file into a form which you can fill directly on your Tablet PC /Digital Pen or Digital PAD with natural handwriting, then export the recognized data back to your original Excel file, or send the data to a database.

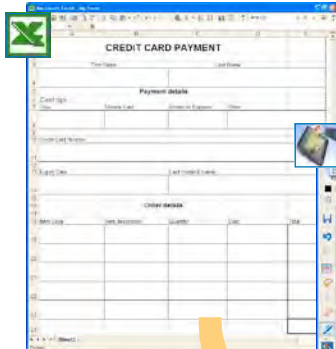

In addition to that, you can put the Smart Form directly on a web-server and make it a web application for use with E-Form WebConnect. Fill it on the web and send the results back to the web server as XML, or to an online database. E-Form WebConnect can also easily convert the smart form for use on your PDA!

- Instantly convert your Excel file into a form which you can fill directly on your Tablet PC /Digital Pen or Digital PAD with natural handwriting.

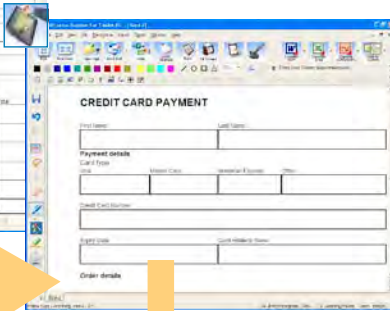

- Put the Smart Form directly on a web-server and make it a web application for use with E-Form WebConnect.

Intelligent forms software: Smart Forms for Smart People!

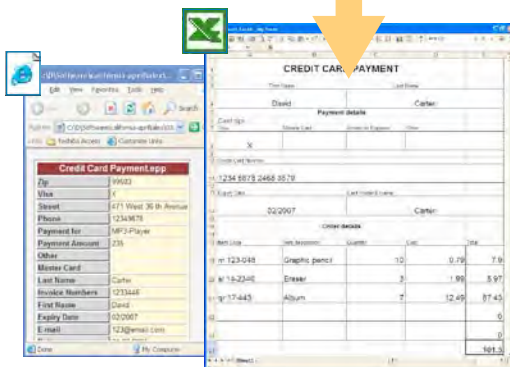

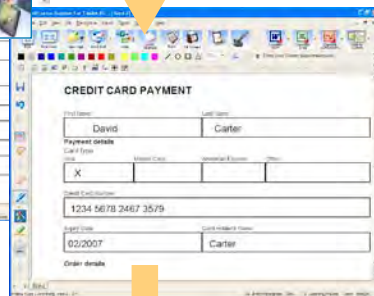

With one click transform Excel document to Smart form

Write on the smart form using a Tablet PC, Digital Pad, Digital Pen or Pocket PC

Recognise handwriting

Export to the SAME Excel document, your data base, etc.

Advantages of user-designed E-Pen&Forms Software:

- Fully integrated digital ink capabilities of the Tablet PC provide natural writing on all types of forms, planning and task prioritizing capabilities, setting up and maintaining appointment schedules, and making and tracking daily notes.
- Digitally capture information during your meetings and conversations, in meetings, on airplanes—anywhere—in your own handwriting.
- Appointments and tasks can be synchronized with Microsoft® Exchange.
- Contact information can be synchronized with Microsoft Contact®.
- Application forms can be synchronized with Excel® table or XML® forms.
- Exchange data with other applications.
- Handwritten notes can be searched, converted to text, copied into other applications, synchronized and even e-mailed.
- Store and make handwritten notes on copies of all your electronic documents—including Word, Excel, PowerPoint, and more—organized and viewable behind customizable tabs.
- Keyword searching and indexing ensures that you can find any note, appointment, or task in an instant.
- Built-in wireless communication capabilities of the Tablet PC allow you to share and synchronize information on the go.
- Just like any paper form, E-Pen&Forms software includes frames for editing (as on an application form) as well as storing and indexing notes and important files. Each frame's interface is intuitive, with specific instructions for each frame. With the Frames feature, you can:
 - Annotate directly on the application forms.
 - Use the digital highlighter and any color pen to make notes.
 - Quickly locate and retrieve notes and documents with the indexing feature.
